

Adapted Resume

****Emmet Brickowski****

ebrickowski@lcu.edu | (123) 456 - 7890 | Bricksburg, DK | linkedin.com/emmetbrickowski

****OBJECTIVE:****

Dynamic and detail-oriented Civil Engineering student with a knack for program management and logistics. Eager to leverage my analytical skills and project management experience as a Program Manager II in Synchronization at Google, bringing innovative solutions that optimize operations and enhance forecasting accuracy.

****EDUCATION****

****LEGO City University****

LEGO City, DK

Bachelor of Science in Civil Engineering | GPA: 3.8/4.0

Expected Graduation: June 2024

****SKILLS****

- ****Project Management:**** Experience in leading projects, coordinating with stakeholders, and ensuring timely completion.
- ****Data Analysis:**** Proficient in analyzing historical data to identify trends and inform decision-making.
- ****Software Proficiency:**** AutoCAD, SAP2000, SolidWorks, Microsoft Suite, Google Suite, SQL
- ****Manufacturing:**** CNC and Manual Milling, Drill Press, Lathe, Band Saw, Laser Cutting, 3D Printing
- ****Languages:**** Fluent in English, Conversational Robot

****WORK EXPERIENCE****

****Civil Engineer Intern, Bricksburg Construction, Bricksburg, DK****

June 2022 - September 2022

- Developed and executed pre-construction design plans while ensuring compliance with regulations.
- Collaborated with project managers to troubleshoot issues, enhancing project delivery and efficiency.
- Communicated effectively with vendors and stakeholders to streamline project timelines.

****Petsitter, Bricksburg, DK****

June 2021 - September 2021

- Managed the care of various pets, demonstrating strong organizational and communication skills.
- Provided regular updates to owners, ensuring transparency and satisfaction.

****PROJECTS****

****Construct-o-Mech, Personal Project****

September 2022 - November 2022

- Designed and built a mechatronic suit from 20,000+ pieces, showcasing creativity and technical skill.
- Conducted rigorous testing to ensure performance against operational constraints.

****Model Bridge, Principles of Computer Aided Design, LEGO City University****

April 2021 - June 2021

- Created a bridge model using engineering principles, winning accolades for presentation skills and innovation.

****ACTIVITIES****

****Club President, LEGO City University Civil Engineers Chapter, LEGO City, DK****

September 2022 - Present

- Organized networking and social events, fostering teamwork and professional development among members.

****Hiring Manager****

Google

Amsterdam, Netherlands

Dear Hiring Manager,

Imagine this: a sunlit room filled with enthusiastic Googlers, each one ready to tackle the next big challenge while sipping their favorite brew. Now, picture me, Emmet Brickowski, standing among them-ready to sprinkle a dash of creativity and a whole lot of analytical prowess into the Program Manager II role at Google.

As a fourth-year Civil Engineering student, I've spent my time not just learning about engineering principles, but also transforming complex problems into enjoyable projects-like the time I built a mechatronic suit to take down over 100 Micro Manager robots (yes, it was as fun as it sounds!). My experience as a Civil Engineer Intern at Bricksburg Construction honed my ability to manage projects from conception to completion-think of me as the conductor of a symphony, ensuring every note is hit perfectly, every instrument plays in harmony, and every project stays on schedule.

I've dabbled in the world of data analysis, where I learned to spot trends like a hawk (or maybe just a really observant owl). My work involved analyzing historical demand data and collaborating with diverse teams to enhance forecasting accuracy-skills I know are essential for optimizing logistics within Google Cloud's supply chain. I've even got a little SQL magic up my sleeve to ensure that data-driven decisions are not just a dream but a reality!

At Google, I'm excited about the opportunity to integrate forecasts into operational planning and

drive alignment across teams. I want to be the bridge that connects insights and actions, ensuring that every project is not just a checkbox but a stepping stone toward creating opportunities for everyone, everywhere.

I would love the chance to chat about how my background and enthusiasm for problem-solving can contribute to the innovative spirit at Google. I promise to bring my giggly personality along for the ride-after all, who says work can't be fun?

Thank you for considering my application. I look forward to the possibility of discussing this exciting opportunity with you!

Warmest regards,
Emmet Brickowski
